Purpose and procedure	97		
EBM notebook			
Jottings . . .	98		
Teaching evidence-based practice on foot	98		
Finding the gold in Medline: clinical queries	101		
Measures of association as used to address therapy, harm, and aetiology questions	102		
EBM teaching tip: Using a tape measure for intra-observer variability	104		
Evidently . . .	105		
Therapeutics			
Rofecoxib for colorectal adenomas increased thrombotic events	106		
Celecoxib for colorectal adenomas increased CV events	107		
Review: a peridischarge multidisciplinary treatment programme reduces readmissions in heart failure	108		
An implantable cardioverter defibrillator but not amiodarone reduced risk of death in congestive heart failure	109		
Ximelagatran was not inferior to warfarin for preventing stroke and systemic embolism in non-valvular atrial fibrillation	110		
Clopidogrel was effective in patients who have MI with ST segment elevation receiving aspirin and fibrinolytic therapy	111		
Aspirin plus esomeprazole reduced recurrent ulcer bleeding more than clopidogrel in high risk patients	112		
Review: dipyridamole given with or without aspirin reduces recurrent stroke	113		
Prophylactic coronary artery revascularisation before elective vascular surgery did not improve long term survival	114		
Review: antibiotics active against atypical pathogens do not improve community acquired pneumonia more than β lactam antibiotics	115		
		Maintenance plus as needed budesonide plus formoterol was better than fixed dose for severe exacerbations in asthma	116
		Review: commonly recommended well-child care interventions are not supported by evidence	117
		Review: early mobilisation is better than cast immobilisation for injured limbs	118
		A functional task exercise programme was better than a resistance exercise programme in elderly women	119
		Review: naltrexone reduces alcohol consumption (in the short-term) in patients with alcohol dependence	120
		Hormone therapy increased incidence and severity of urinary incontinence in healthy postmenopausal women	121
		Review: delayed pushing reduces rotational or mid pelvic instrumental deliveries but increases duration of the second stage of labour in women having epidural analgesia	122
		Diagnosis	
		Review: no single physical examination sign rules in or out osteoporosis or spinal fracture	123
		Colonoscopy detected colon polyps better than air contrast barium enema or computed tomographic colonography	124
		Clinical prediction guide	
		A clinical prediction rule predicted outcome in patients with low back pain having spinal manipulation and exercise treatment	125
		Additional articles abstracted in ACP Journal Club	126
		Other articles noted	127
