Purpose and procedure	65	Review: LABAs are better than leukotriene receptor antagonists when added to inhaled corticosteroids in recurrent asthma	82
EBM notebook		Daily folic acid supplementation for 3 years improved cognitive function in older persons	83
Jottings...	66	Review: eradication therapy supplemented by probiotics increased eradication rates and reduced side effects in <i>H pylori</i> infection	84
Evidently	69		
Therapeutics		Aetiology	
Continuing alendronate for an additional 5 years maintained bone mineral density in postmenopausal women	70	After midtrimester amniocentesis the risk of spontaneous pregnancy loss was 6 per 10 000	85
Annual mammographic screening beginning at 40 years of age did not significantly reduce breast cancer mortality after 10 years in women	71	Economics	
Review: SSRIs lead to improvement in depression by the end of the first week	72	Collaborative care for depression in patients with diabetes increased depression free days and had economic benefit	86
Self management plus usual care was more effective than usual care alone for lower urinary tract symptoms in men	73	Clinical prediction guide	
Review: diacerein is more effective than placebo and is as effective as NSAIDs for knee and hip osteoarthritis	74	Review: Framingham risk scores have variable accuracy in predicting CVD events in different patient populations	87
Review: inhaled corticosteroids reduce hospital admission and increase discharge rate during the first 4 hours in the emergency department for acute asthma	75	The ABCD, California, and unified ABCD ² risk scores predicted stroke within 2, 7, and 90 days after TIA	88
Review: the current evidence does not suggest that oral contraceptives hasten resolution of functional ovarian cysts	76	The Manchester Self Harm Rule had good sensitivity but poor specificity for predicting repeat self harm or suicide	89
Etomidate had shorter induction and recovery times than midazolam for fracture reduction	77	Resource review	90
Herbal supplements did not relieve vasomotor symptoms of menopause in women	78	Letter	
Review: prokinetics, histamine H ₂ receptor antagonists, antimuscarinics, and proton pump inhibitors improve global symptoms in non-ulcer dyspepsia	79	How should clinicians interpret results reflecting the effect of an intervention on composite end points?	92
Prompt insertion of tympanostomy tubes in infants and toddlers with persistent middle ear effusion did not improve developmental outcomes at 9–11 years of age	80	Viral infections need to be excluded from the cohort for the results to be truly meaningful	93
Encouraging influenza vaccination for nursing home staff reduced mortality and influenza like illness in the residents	81	Additional articles abstracted in ACP Journal Club	94
