98 Students' PEARLS: successfully incorporating evidence-based medicine in medical students' clinical attachments

100 The devil is in the details... or not? A primer on individual patient data meta-analysis

101 What kind of randomised trials do patients and clinicians need?

103 Selecting "Aetiology" articles for the *Evidence-Based Medicine* journal

Therapeutics

104 Annual screening for prostate cancer did not reduce mortality from prostate cancer

105 Periodic screening with prostate-specific antigen testing reduced mortality from prostate cancer

106 Review: low glycaemic-index diets reduce HbA_{1c} more than high glycaemic-index diets in diabetes mellitus

107 Review: multiple-session traumafocused CBT within 3 months of event reduces symptoms in acute stress disorder and PTSD

108 Intensive primary care treatment reduced cardiovascular risk factors in screen-detected type 2 diabetes

109 Review: pneumococcal vaccination is not effective for preventing pneumonia, bacteraemia, bronchitis, or mortality

110 Review: intranasal mupirocin ointment reduces *Staphylococcus aureus* infections in nasal carriers

111 Rofecoxib increased risk of CV events in patients with history of colorectal adenomas ≥ 1 year after stopping treatment

112 Oral vitamin K did not reduce bleeding in patients with excessive anticoagulation after receiving warfarin

113 1 day of nitrofurantoin was not as effective as 7 days for asymptomatic bacteriuria in pregnancy

114 Step-up and step-down treatment strategies did not differ for symptom relief at 6 months in new onset dyspepsia

115 Continued use of antipsychotic drugs increased longterm mortality in patients with Alzheimer disease

116 Review: interpersonal psychotherapy is slightly better and supportive therapy is worse than other therapies for depression

117 Review: back exercise interventions prevent self-reported episodes of back problems in adults but ergonomic education does not

118 A behavioural weight-loss programme was better than an education programme for urinary incontinence in overweight and obese women

119 Review: antidepressants and psychological therapies improve symptoms of irritable bowel syndrome

120 An exercise and telephone follow-up programme reduced emergency readmissions and improved quality of life in older people

121 Review: adding dexamethasone to standard therapy reduces short-term relapse for acute migraine in the emergency department

Clinical prediction guide

122 Absolute CVD risk, stratified by risk score, was 20% higher in primary care patients with CVD than in those without CVD

Quality improvement

123 Care coordination for patients with chronic conditions did not reduce hospital admissions or Medicare costs

Resource reviews
