

# Evidence-Based Medicine

## Contents

### Editorial

129 What is EBM?

### Methods

131 Impact of facilitating physician access to relevant medical literature on outcomes of hospitalised internal medicine patients: a randomised controlled trial

### Prognosis

136 Thrombolysis improves 90-day functional outcome in acute ischaemic stroke, even in very older people

### Therapeutics

138 Cardiac resynchronisation therapy is efficacious in patients with mild heart failure symptoms

139 Oral rivaroxaban for acute DVT, or long term for VTE, is as effective as enoxaparin followed by a vitamin K antagonist for preventing recurrence, with no increase in bleeding complications

141 *Lactobacillus rhamnosus GG* reduces frequency and severity of abdominal pain compared with placebo in children with irritable bowel syndrome

142 NSAID use associated with increased cardiovascular risk and death, but naproxen appears to be the least harmful

143  $\alpha$ -blockers and antibiotics, alone or in combination, improve symptoms in men with chronic prostatitis/chronic pelvic pain syndrome

144 Addition of omeprazole to dual antiplatelet therapy with clopidogrel plus aspirin lowers the risk of upper gastrointestinal bleeding

October 2011 Vol 16 No 5

146 Oral antiretroviral pre-exposure prophylaxis reduces the risk of HIV acquisition among men who have sex with men

147 CBT stress management reduces recurrent CAD events after myocardial infarction

148 Initial treatment of hypertension with aliskiren and amlodipine combination gives 6.5 mm Hg greater reduction in systolic BP than does either monotherapy

150 Amoxicillin-clavulanate improves symptoms, reduces treatment failure in select children with acute otitis media and increases risk of diarrhoea

152 PREDIMED trial: Mediterranean diet may reduce the risk of type 2 diabetes

153 Vitamin D supplementation of deficient children may improve bone mineral density

154 Training birth attendants in rural Zambia in neonatal resuscitation, and the use of amoxicillin coupled with facilitated referral, reduces neonatal mortality

156 Two weeks of rifaximin relieves global symptoms and bloating in people with IBS without constipation

157 The quadrivalent HPV vaccine is effective prophylaxis against HPV-related external genital lesions in young men

159 Escitalopram reduced hot flashes in non-depressed perimenopausal and postmenopausal women
