

# Evidence-Based Medicine

## Contents

April 2013 Volume 18 No 2

### Editorial

- 43 Accentuating the positive

### Perspective

- 44 The role of angiotensin receptor blockers in the prevention of cardiovascular and renal disease: time for reassessment?

### Original EBM research

- 48 A comparison of the accuracy of clinical decisions based on full-text articles and on journal abstracts alone: a study among residents in a tertiary care hospital

### Systematic review

- 54 Psychological consequences of false-positive screening mammograms in the UK

### Therapeutics

- 62 Cessation of donepezil is associated with clinical decline in patients with moderate-to-severe Alzheimer's disease compared to continuation of donepezil or addition or substitution of memantine
- 63 Exercise may be beneficial for patients with chronic severe sciatica who would normally qualify for surgery
- 64 Coronary CT angiography reduces unnecessary admissions and allows safe discharge of emergency department patients with low-to-intermediate risk chest pain
- 65 Tranexamic acid reduces blood transfusion in surgical patients while its effects on thromboembolic events and mortality are uncertain
- 67 Non-operative management of uncomplicated acute appendicitis: using antibiotics is effective and decreases morbidity
- 68 Bariatric intervention effective at reversing Type 2 diabetes
- 69 Thromboprophylaxis in heart failure patients with sinus rhythm: aspirin and warfarin lead to similar cardiovascular outcomes

### Prevention

- 71 Probiotics are associated with a decreased risk of antibiotic-associated diarrhoea
- 72 No benefit and potential harm with an educational and care management programme for chronic obstructive pulmonary disease
- 73 Among statin-treated patients, LDL, non-HDL and apoB cholesterol biomarkers were associated with increased risks of cardiovascular events

### Diagnosis

- 75 Review of evidence concerning PSA screening for prostate cancer has limitations as basis for policy development

### Prognosis

- 77 Parent-reported sleep-disordered breathing symptoms early in life predict childhood behavioural problems at age 4 and 7 years

### Letters

- 79 In reference to: amoxicillin-clavulanate improves symptoms, reduces treatment failure in select children with acute otitis media and increases risk of diarrhoea
- 80 Comment on 'A qualitative approach to Bayes' theorem' by Medow and Lucey

### Online articles

- e11 Mild biliary pancreatitis: interval (delayed) cholecystectomy is associated with readmission for recurrent biliary events
- e12 Dietary interventions more effective than physical activity or mixed interventions for weight management during pregnancy
- e13 Metformin may not reduce cardiovascular risk or all-cause mortality
- e14 Aspirin prophylaxis in people without prior cardiovascular disease does not lead to reductions in cardiovascular death or cancer mortality
- e15 Application of 4% chlorhexidine solution for cord cleansing after birth reduces neonatal mortality and omphalitis
- e16 Atrial fibrillation is associated with an increased risk of cognitive and functional decline
- e17 Mammography screening in Norway caused substantial overdiagnosis and did not reduce late-stage breast cancers
- e18 Weight loss and improved fitness slow down the decline in mobility in obese adults with type 2 diabetes
- e19 Thrombolytic therapy with or without a vena cava filter results in a lower case fatality rate in unstable patients with acute pulmonary embolism
- e20 Delayed acyclovir therapy in neonates with herpes simplex virus infection is associated with an increased odds of death compared with early therapy
