## Contents

|  |     |  |                   |
|--|-----|--|-------------------|
| <b>Purpose and procedure</b> .....   | 130 | Review: tricyclic antidepressants, capsaicin, gabapentin, and oxycodone are effective for postherpetic neuralgia .....         | 147               |
| <b>Additional articles abstracted in ACP Journal Club</b> .....  | 131 | Review: home visiting with multidimensional assessment and multiple visits is effective in low risk elderly people ....        | 148               |
| <b>EBM notebook</b>  |     | Sertraline maintenance treatment reduced relapse and dropouts in post-traumatic stress disorder .....                          | 149               |
| Practice corner: using clinical prediction rules.....  | 132 | Review: brief interventions reduce drinking in patients not seeking treatment .....  | 150               |
| <b>Resource review</b> .....   | 135 | A brief intervention reduced alcohol drinking for up to 48 months in problem drinkers .....                                    | 151               |
| <b>Therapeutics</b>  |     | A normal calcium, low protein, low salt diet reduced recurrence of renal stones over 5 years .....                             | 152               |
| Oestrogen plus progestogen increased coronary heart disease and breast cancer events in postmenopausal women.....                                | 137 | Physiotherapy or a wait and see policy were the best options for lateral epicondylitis at 1 year .....                         | 153               |
| Review: postmenopausal oestrogen replacement therapy increases the risk for venous thromboembolism .....   | 138 | Bed rest, physiotherapy, and continuation of activities of daily living were equally effective for sciatica .....              | 154               |
| A lifestyle intervention or metformin prevented or delayed the onset of type 2 diabetes in people at risk .....                                  | 139 | Review: antiemetic drugs reduce nausea in early pregnancy .....  | 155               |
| Warfarin combined with low dose aspirin in myocardial infarction did not provide clinical benefit beyond that of aspirin alone .....             | 140 | Telephone-based peer support increased the duration of breast feeding in primiparous mothers .....                             | 156               |
| Review: angiotensin receptor blockers do not reduce mortality or hospital admission rates in heart failure .....                                 | 141 | Clonidine and methylphenidate were effective for attention deficit hyperactivity disorder in children with comorbid tics ..... | 157               |
| Review: n-3 polyunsaturated fatty acids reduce fatal myocardial infarction, sudden death, and overall mortality in coronary artery disease ..... | 142 | Pharmacist review changed more repeat prescriptions for elderly patients than usual general practice review .....              | 158               |
| Parental education and guided self management of asthma or wheeze in pre-school children was not effective .....                                 | 143 | <b>Diagnosis</b>   |                   |
| Review: inhaled corticosteroids for asthma or chronic obstructive pulmonary disease do not increase bone loss ...                                | 144 | Review: questionnaires for detecting clinical depression in primary care have similar diagnostic accuracy.....                 | 159               |
| Review: nedocromil sodium decreases airflow reduction and recovery time in exercise induced bronchoconstriction .....                            | 145 | <b>Aetiology</b>   |                   |
| Review: $\beta_2$ agonists are ineffective but increase adverse effects in acute bronchitis without underlying pulmonary disease .....           | 146 | Increased plasma total homocysteine levels increased the risk for dementia in the elderly .....                                | 160               |
|  |     | <b>Glossary</b> .....  | Inside back cover |

The virtual journal Paediatric Asthma, produced by the American Academy of Pediatrics and the BMJ Publishing Group, is now available free of charge to EBM subscribers at [www.pediatric-asthma.org](http://www.pediatric-asthma.org)
